JUAN MACEDO

Câmara de Lobos, Portugal | juan.macedo.dev@proton.me | linkedin.com/in/juan-macedo-69260a91 | github.com/Aspherioth

PROFESSIONAL SUMMARY

Frontend Software Engineer with 8+ years of experience building performant, accessible web and smart TV interfaces for enterprise clients including Manchester City, TV Asahi, and San Francisco Opera. Helped lead a multi-year React migration of a large-scale streaming platform serving millions of users, modernizing a legacy JavaScript codebase into a maintainable, component-based architecture. Comfortable across the modern frontend stack, including React, React Native, Next.js, and TypeScript, with a strong focus on performance optimization, responsive design, and cross-platform compatibility. Works closely with design, product, and backend teams to ship reliable, high-traffic applications.

TECHNICAL SKILLS

Languages & Styling: JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS, Tailwind CSS

Frameworks & Libraries: React, React Native, Next.js, React Hooks, Context API

Testing & Quality: React Testing Library, Vitest, Unit and Component Testing, Cross-browser Testing, Performance Optimization, Web Accessibility (WCAG)

Architecture & Practices: Component-Driven Development, Reusable Component Design, Incremental Legacy Migration, Responsive Web Design, RESTful API Integration, Code Reviews, Agile/Scrum

Tooling: Git, Webpack, npm, WebStorm, VS Code, Chrome DevTools, JIRA

AI-Assisted Development: Daily use of Claude for coding, debugging, code review, and learning new technologies; writing effective prompts and instructions for AI tools, and critically reviewing generated code

Also worked with: Node.js, MongoDB, Redux, Angular

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Brightcove August 2019 – May 2025

Beacon Streaming Platform and Fire TV Player SDK | Funchal, Portugal

- Helped lead a React migration initiative (2023–2025) for an enterprise streaming platform, incrementally replacing legacy vanilla JavaScript screens with React components running alongside the existing codebase, improving application performance and maintainability.
- Served as lead developer on a React Native player SDK for Amazon's latest Fire TV devices, written in TypeScript and integrating directly with Brightcove's streaming backend to deliver consistent, high-performance playback for developers building apps on those devices.
- Developed responsive web interfaces for multi-platform streaming applications serving millions of users across smart TV devices, for clients including Manchester City, TV Asahi, Télé-Québec, and San Francisco Opera.
- Built reusable React components following modern patterns and best practices, ensuring consistent UI/UX across all platform touchpoints.
- Optimized frontend performance using code splitting, lazy loading, and bundle optimization to improve load times across diverse network conditions.
- Collaborated in an Agile environment with cross-functional teams of backend engineers, designers, and product managers, contributing to sprint planning, code reviews, and architectural decisions.
- Integrated RESTful APIs and streaming protocols for real-time content delivery, handling authentication, user preferences, and video playback states.

Software Engineer, TV App Agency May 2017 – August 2019

Funchal, Portugal | Acquired by Brightcove in 2019

- Developed web-based interfaces for smart TV applications using vanilla JavaScript, HTML5, and CSS3, ensuring compatibility across Samsung Tizen, LG webOS, and Android TV.
- Introduced modern development workflows, including Git version control (migrating the team from SVN) and SASS preprocessing for improved CSS maintainability.
- Created responsive layouts adapting to various screen sizes and input methods (remote control, touch, mouse) to enhance the cross-device experience.
- Built custom UI components including carousels, video players, and navigation systems optimized for TV remote control interaction.
- Resolved cross-platform compatibility issues to ensure consistent behavior across different TV operating systems and browser engines.

PROJECTS

Finwise, Personal Project 2025

Next.js, TypeScript, Tailwind CSS, Vitest, React Testing Library | github.com/Aspherioth/finwise

- Built a personal finance tracker from scratch using the Next.js App Router, featuring a dashboard, a filterable transactions page, and transaction creation, applying modern React patterns including Server and Client Components.
- Wrote unit tests with Vitest and React Testing Library, working through component testing patterns and a test-driven workflow.
- Structured the project in TypeScript with reusable, well-typed components and an emphasis on maintainability.

League of Legends Build Calculator 2014

MongoDB, Express.js, Angular, Node.js

- Built a full-stack build calculator with a team of five, featuring real-time statistical calculations and dynamic data visualization for game statistics and item configurations.
- Gained hands-on experience with SPA architecture, RESTful API design, and NoSQL databases.

EDUCATION

B.Sc. Computer Science, Universidade da Madeira 2011 – 2015

Funchal, Portugal

LANGUAGES

Portuguese: Native
English: Professional Working Proficiency (C1 Reading / Listening, B2 Speaking, C1 Writing)
